

See how it works in community clinics

What are FLU-FIT & FLU-FOBT Programs?

FLU-FIT and FLU-FOBT Programs allow healthcare providers to increase access to colorectal cancer screening by offering home tests to patients at the time of their annual flu shots. Successful FLU-FIT and FLU-FOBT Programs have been implemented in community health centers, in a public hospital, and in a large health maintenance organization. They have also been pilot tested in commercial pharmacies.

On this website, you will find information to develop your own successful FLU-FIT or FLU-FOBT Program.
