

10

Days Until
the New Year!

Just 10 days to go! As we approach the new year, the Evidence-Based Cancer Control Programs (EBCCP) team would like to take a moment to thank all the caregivers and providers supporting cancer patients. Your work is critical in preventing, minimizing, and managing the adverse effects of cancer and its treatment.

The EBCCP website features [19 evidence-based programs](#) on survivorship and supportive care, including The Touch, Caring and Cancer Program in Chicago. Designed to enhance the quality of life for cancer patients and their caregivers using touch, this self-directed, multimedia instructional intervention teaches simple techniques to provide comfort and relaxation in cancer caregiving. **Read [the case study](#) to learn how to implement a similar program in your community or clinical setting.**
