Evidence-Based Cancer Control Programs Sponsored by the National Cancer Institute

The National Cancer Institute's (NCI) Evidence-Based Cancer Control Programs (EBCCP) [website](#) recently added [case studies for teaching](#) to help students develop their public health competencies related to research, evaluation, and implementation science. Visitors to the site can download instructor and student guides, presentations, and

answer keys. One case study on the evaluation of research evidence is [available now](#), and more are under development. Visit the [site](#) today!
