

Check your skin for sun damage.

It's as easy as 1, 2.

#1 Look everywhere once a month.

#2 Check for changing moles or spots.

disrobe fully

check everywhere you can see

don't forget your scalp

...and your back

...and the back of your legs

...and the soles of your feet

basal cell cancer

squamous cell cancer

melanoma

basal cell cancer

squamous cell cancer

melanoma

Well, there **is** a **#3**
See your doctor with any concerns.
